Cover Letter

Dear Madam, Sir,

My name is Lyes Sefiane (He/Him), Permanent Resident of Canada with more than 8 years experience in the software development and delivery industry and two Master's degrees from two different universities (Paris 8 University and Paris Dauphine University). Please refer to my LinkedIn profile (<https://linkedin.com/in/lyes-sefiane>) and GitHub (<https://github.com/lyes-s>) for more details.

After **5.4 amazing years** developing, designing, expanding a **Java Desktop Application** for Ciena Corporation as a full time employee (along with 04 developers - contractors) dedicated to the Optical Networking domain (reporting to the Director Service Innovation at Ciena Corporation) to aid the Ciena's network engineers on their daily tasks, I decided to take a break following my resignation on **July 29, 2022** which triggered a full background check.

On **December 2022**, I moved from **Montreal** to **Ottawa** to looking for a new job opportunity (while my a full background check was in progress) in the applied software development and/or engineering domain as a Software Development Manager, Software Engineering Manager or Software Product Manager after the completion of the Educational Credential Assessment (ECA) provided by Comparative Education Service (CES) of the University of Toronto of my Master's degree earned from Paris Dauphine University.

During my experience at Ciena Corporation I had an amazing opportunity to being a Team Leader for the software development team (04 Software Developers) and the delivery planning and management of the solution for more than 02 years for which I want to move beyond this responsibility to become a Software Development Manager, Software Engineering Manager or a Software Product Manager.

Do not hesitate to reach out to me for more information regarding my profile and application.
